

this commision makes me sick. The fact that you spend your time censoring movies on network television and yet let crap like Survivor and Fear Factor escape as "viewable" If you want to do society a favour by shoving your useless morals down our throats, hang yourself, it would be appreciated. I know where my morals stand, and i don't need some grand commission sueing companies every time they see something that doesn't sit quite right with them, because there is another option, its called TURNING OFF THE STUPID TV. thankfully Canada hasn't been so strict as to censor our national television as harshly.
with hopes that you all find peace burning in hell,
-Patrick
